

Go-Probe Sensors

In order to provide a comprehensive Data Centre and Server Room monitoring solution it is extremely important to monitor for the presence of any potential environmental threats. Jacarta Go-Probe sensors are easy to install and configure and are compatible with all Jacarta monitoring devices.

Jacarta Water Detector

Using an advanced leak detection cable, the Water Detector can sense the presence of water along its length. The water detector can be supplied with up to 18m of leak sensing cable.

Jacarta Security Sensor

The Security Sensor is a magnetic reed switch that can be used to detect the opening of doors, racks, windows and cupboards.

Jacarta Smoke Detector

The Smoke Detector is a mains powered, ionisation based smoke detection unit that can be positioned to monitor for early signs of fire, providing both an alarm to your Jacarta device in addition to an audible alarm.

Jacarta Voltage Sensor

The Voltage Sensor can be used to monitor spare power outlets for outages and interruptions. As soon as power to the outlet is lost the sensor will trigger an alarm.

Jacarta Motion Sensor

The Motion Sensor uses Passive Infra-Red (PIR) technology to detect the presence of movement and trigger an alarm.

Jacarta Universal Dry Contact Sensor

Universal sensors can be used to monitor any normally open / closed output such as those provided by UPS, air conditioners, BMS devices, security alarm panels, generators, fire alarm panels, etc.

Jacarta Airflow Sensor

The Airflow Sensor can be used to monitor the presence of airflow coming out of air-conditioning units. If the sensor detects a loss of airflow an alarm is triggered.

Jacarta Vibration Sensor

The Vibration Sensor detects the vibrations caused during attempts to penetrate the protected rack door, wall or roof. The sensor features adjustable sensitivity to help prevent false alarms.

Jacarta Carbon Monoxide Detector

The Carbon Monoxide sensor detects the presence of dangerous Carbon Monoxide gases and provides an audible alarm in addition to triggering an alarm on your Jacarta device.

Go-Probe sensors are supplied with either 4 or 18m of interface cable to connect to your Jacarta Environmental Monitoring Device however alternative lengths are available on request (subject to maximum cable lengths).

All sensors are supplied with a 2-Year Warranty as standard.
